DRUGAČNOST: SVETLOBNI MODUL

Hermetično zaprto ohišje **IP67**

Pokrov - leča

Vodoodporno

Zrak je iztisnjen **Zrak**

Ar

Polnjenje s plinom argonom

Življenjska doba LED > 100.000 ur

Brez kondenzacije

Za skrajne podnebne razmere

The diagram shows a cross-section of a light module. It features a grey, hermetically sealed housing (IP67) with a clear lens cover. Inside, there are several rows of LED chips. A blue arrow labeled 'Ar' indicates the filling of the module with argon gas. A red arrow labeled 'Zrak' shows air being pushed out during the filling process. The module is described as waterproof and suitable for extreme weather conditions. It also highlights a long LED lifespan of over 100,000 hours and the absence of condensation.

ALL IN ONE

SMART POVEZAVA

WLAN

Radar

VIDEO SURVEILLANCE

The diagram illustrates a smart street light with multiple integrated features. A central grey light fixture is shown with red arrows pointing to various components. To the left, there are two blue modules labeled 'Classic' and 'Smart'. To the right, a wireless antenna is shown. Below the light fixture, three icons represent different capabilities: 'WLAN' (wireless network), 'Radar' (detection technology), and 'VIDEO SURVEILLANCE' (security camera). The text 'SMART POVEZAVA' (smart connectivity) is positioned at the top right.
